

Gigamon Authorized Training

Presented by  **Fast Lane**

Global Training Provider

Grow Your Expertise!

In order to secure the high-speed networks needed to keep pace with today's market, you need to ensure your best-of-breed inline threat prevention tools are working optimally and you can do that with the GigaSECURE Security Delivery Platform. To optimize this platform within your business and ensure the smooth adoption of technology, you will need formal training provided by Gigamon's exclusive Authorized Training Partner in EMEA, Fast Lane Consulting and Education Services.

The following training programs will boost your Gigamon product expertise, helping you more effectively design, deploy and troubleshoot the Gigamon security solutions. This means faster deployment, better adoption of technology and therefore improved ROI.

Gigamon Training Classes:

Gigamon Foundation: Learn the Essentials to Start on the Road to Success

Delegates will learn how to initially deploy Gigamon products on to the network, how to create and work with flow maps which will ensure your tools get just the right data they need to run optimally.

Designing and Implementing the Gigamon InLine Bypass Threat Prevention Solution: Take Your Skills to the Next Level

Delegates will learn how to design and implement security solutions using classic inline bypass, flexible inline arrangements and inline SSL.

Gigamon Certified Professional Boot Camp: Advanced Skills for True Professionals

Link to the Gigamon Certified Professional Exam Upon completion, delegates will be ready to design and implement the GigaSECURE Security Delivery Platform pervasively across their physical and virtual data centers. The class helps delegates prepare for the Gigamon Certified Professional exam, recently launched by Gigamon.

Fast Lane provide private and public classes through the following modalities: classroom, online, onsite at your location or FLEX (combination of classroom and virtual). We are also able to tailor the content and adapt for specific customer deployments where required.

Payment can be made by either using the Gigamon Education Vouchers which have been purchased through the Gigamon channel, or directly with Fast Lane.

Please contact Jason Coleman & Jennie Burley at gigamon@flane.co.uk for further assistance.
