

Today's jobs are more complex and specialized than ever, especially in the area of cloud technologies. To be effective in your job you need specific training on the products and services you use in your role, and in the way you use them in your role. In order to most effectively support businesses of today on their Azure rollouts, Fast Lane provides full capabilities to support the learning and certification paths for Microsoft's official Azure Administrator, Azure Developer and Azure Solution Architect – three of the most critical Azure roles today.

- Explore role-based certifications that prepare you for an Azure career
- Earn a role-based certification that shows you are keeping pace with today's technical roles and requirements. Skill up, prove your expertise to employers and peers, and get the recognition and opportunities you've earned
- Learning paths guide you through the training and help prepare you for developer, administrator, and solutions architect careers and Microsoft Azure certifications
